Appendix 11 Regenerated cellulose fibres

To be completed by the manufacturer of regenerated cellulose fibres.

Trade name:_____

Production site:_____

I/we manufacturer(s) of regenerated cellulose fibres declare:

O12. Is chlorine gas used in bleaching cellulose pulp or cellulose fibres? ☐ Yes ☐ No

If yes, state the annual amount used?_____

O13. Are emissions of sulphur to the air < 120 g S/kg filament fibre and < 30 g/kg for staple fibre, expressed as an annual average? ☐Yes ☐ No

Evaluation & verification: A test report from the manufacturer of regenerated cellulose fibres showing that the requirement is fulfilled.

Attachment: _____

O14. Are emissions of zinc to water < 0.3 g Zn/kg regenerated cellulose, expressed as an annual average?

☐ Yes ☐ No

Evaluation & verification: A test report from the manufacturer of regenerated cellulose showing that the requirement is fulfilled.

Attachment: _____

O15. Is the copper content of the effluent from the plant that produces cupro fibre < 0.1 ppm, expressed as an annual average? ☐ Yes ☐ No

Evaluation & verification: A test report from the manufacturer of cupro fibre showing that the requirement is fulfilled.

Attachment: _____

O27. Are substances added[1] and/or integrated which can have a biocide and/or antibacterial effect? Silver compounds, nano silver and nano gold are also considered antibacterial substances.

☐ Yes ☐ No

If yes, which type of biocide, and how much?_____

[1]Added substances comprise all chemical products and ingredients of these, including, additives (e.g. pigments) in ingredients, but not contaminants from raw material, incl. raw material production Contaminants are defined as residues from raw material, incl. raw material production present in the finished product in concentrations of less than 100 ppm (0.01 weight %, 100 mg/kg), but not substances that are added to a raw material or product for a purpose, irrespective of quantity.

Is the fibre dyed? ☐ Yes ☐ No

If yes, the dyes must fulfil chapter 2.4.2.
