Appendix 12c Regenerated cellulose fibres or dissolving pulp

Applicant/supplier:
Product group/type:
Version and date of the list of prohibited tree species used:

Does the regenerated cellulose fiber or dissolving pulp contain at least 75% by weight of recycled material∗? ☐ Yes ☐ No

If the regenerated cellulose fibers or dissolving pulp contain less than 75% by weight of recycled material∗ indicate how much:_____

Does the regenerated cellulose fibers or dissolving pulp contain at least 50% by weight of certified wood fibers? ☐ Yes ☐ No

∗ *Recycled material defined according to ISO 14021 in the following two categories:*

Definition of pre-consumer material: Material diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Definition of post-consumer material: Material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

Nordic Ecolabeling defines byproducts from primary wood industries (sawdust, wood chips, bark ect.) or residues from forestry (bark, branches, roots etc.) as recycled material.
