Appendix 24 Glue

To be completed by the glue manufacturer.

Type of glue and application:
_____

Glue manufacturer:
_____

O25. Does the product contain substances which are listed on Reach's candidate list?
☐ Yes ☐ No

Link to the Reach's candidate list: http://echa.europa.eu/web/guest/candidate-list-table

O26. Are any of the following chemical substances added[1] to the product/raw material?

- Alkylphenol ethoxylates (APEO) ☐ Yes ☐ No
- Linear alkyl benzene sulphonates (LAS) ☐ Yes ☐ No
- Ditallow dimethyl ammonium chloride (DTDMAC), distearyl dimethyl ammonium chloride (DSDMAC), dihydrogenated tallow dimethyl ammonium chloride (DHTDMAC) ☐ Yes ☐ No
- Ethylenediaminetetraacetic acid (EDTA) og diethylenetriaminepentaacetic acid (DTPA) ☐ Yes ☐ No
- Phthalates[2] ☐ Yes ☐ No
- Fluorinated organic compounds, such as PFOA (perfluorooctanoic acid and salts/esters thereof), PFOS (perfluorooctyl sulphonate and its compounds), PTFE (polytetrafluoroethylene), etc. ☐ Yes ☐ No

[1]*Added substances comprise all chemical products and ingredients of these, including additives (e.g. pigments) in ingredients, but not contaminants from raw material, incl. raw material production. Contaminants are defined as residues from raw material, incl. raw material production present in the finished product in concentrations of less than 100 ppm (0.01 weight %, 100 mg/kg), but not substances that are added to a raw material or product for a purpose, irrespective of quantity.*

[2]*This applies to phthalates listed in Reach's appendix XVII. Phthalates listed in the candidate list are excluded in requirement K25.*

O48. Are finishing agents or preparations that contain more than 0.1 weight % of substances that have been assigned or may be assigned one or more of the risk phrases in Table 3 being used?

☐ Yes ☐ No

Hazard class	**Hazard symbols and R-phrases in accordance with directive 67/548/EEC***	**CLP-regulation 1272/2008***
Environmental hazard	N with R50, R50/53, R51/53, 52/53 and R53	Dangerous to aquatic environments. Category acute 1 H400, category chronic 1 H410, category chronic 2 H411, category chronic 3 H412 and/or category chronic 4 H413
Carcinogenic	T with R45 or R49 Or Xn with R40	Carc 1A/1B/2 with H350, H350i and/or H351
Mutagenic	T with R46 or Xn with R68	Mut 1B/2 with H340 and/or H341
Harmful to reproduction	T with R60 and/or R61 Or Xn with R62 and/or R63	Repr 1A/1B/2 with H360, H361

**The classification applies in accordance with EU substance directive 67/548/EEC with later changes and adjustments, and/or CLP regulation 1272/2008 with later changes. During the transition period, i.e. until 1 June 2015, classification in accordance with the EU substance directive or the CLP regulation can be used. After the transition period, only classification in accordance with the CLP regulation will apply. A list of R-phrases and their meaning is provided in Appendix 30*

Please note that the chemical manufacturer is responsible for correct classification.

O59. Is colophon resin or formaldehyde added to the glue, except as a contaminant[1]?

☐ Yes ☐ No

[1] Contaminants are defined as residues from raw material, incl. raw material production present in concentrations of less than 100 ppm (0.01 weight %, 100 mg/kg), but not substances that are added to the raw material or product for a purpose, irrespective of quantity.
