Appendix 3 Cotton and other natural cellulose seed fibres

To be completed by the applicant.

Production site: _____

I/we manufacturer(s) of cotton declare:

O3. How much of the cotton used in production of ecolabelled textiles is organically farmed[1] or farmed during a transition to organic farming % :_____

Evaluation & verification: A valid certificate showing that the cotton is organically farmed.

Attachments: _____

[1]*Organic' means cotton farmed in accordance with the European Council's regulation (EEG) no. 834/2007 of 28 June 2007 on the organic production of agricultural products, or productsproduced in the same way and under equivalent control measures. Examples are: KRAV,IFOAM, KBA, OCIA, TDA, DEMETER*

O3. Does the remaining part of the cotton at least fulfil the requirements for conventional cotton[2]?

☐ Yes ☐ No

Evaluation & verification: Test reports showing that the requirement is fulfilled or a confirmation from the farmers that the aforementioned substances are notused, as well as an overview of the percentage of cotton in question.

Attachments: _____

[2] *The conventionally farmed cotton may contain a maximum of 0.05 ppm of each of the following substances: aldrin, captafol, chlordane, DDT, dieldrin, endrin, heptachlor, hexachlorobenzene, hexachlorocyclohexane (total isomers), 2,4,5-T, chlordimeform, chlorobenzilate, dinoseb and its salts, monocrotophos, pentachlorophenol, toxaphene, methamidophos, methylparathion, parathion, phosphamidon, glufosinate and glyphosate. The tests shall be carried out on raw cotton, i.e. before wet treatment, on each batch of cotton received, according to the test methods given in Appendix 29. If the traceability of the cotton can be documented back to the individual farmer for at least 75% of the utilised cotton, and these can confirm that the aforementioned substances are not used during the farming of the cotton, it is not necessary to submit test reports.*

O27. Are substances added[3] and/or integrated which can have a biocide and/or antibacterial effect? Silver compounds, nano silver and nano gold are also considered antibacterial substances.

☐ Yes ☐ No

If yes, which type of biocide, and how much?_____

[3] *Added substances comprise all chemical products and ingredients of these, including additives (e.g. pigments) in ingredients, but not contaminants from raw material, incl. raw material production. Contaminants are defined as residues from raw material, incl. raw material production present in the finished product in concentrations of less than 100 ppm (0.01 weight %, 100 mg/kg), but not substances that are added to a raw material or product for a purpose, irrespective of quantity.*
