Appendix 8 Polyamide fibres

To be completed by the manufacturer of polyamide fibres.

Trade name:_____

Production site:_____

I/we manufacturer(s) of polyamide fibres declare:

O9. Are emissions of nitrogen dioxide (N2O) to the air from the production of monomers less than 10 g/kg produced polyamide 6 fibres, and 50 g/kg produced polyamide 6.6 fibre, expressed as an annual average?

☐ Yes ☐ No

Evaluation & verification: Attach detailed information and/or a test report from the polyamide manufacturer showing that the requirement is fulfilled.

Attachment:_____

O27. Are substances added[1] and/or integrated which can have a biocide and/or antibacterial effect? Silver compounds, nano silver and nano gold are also considered antibacterial substances.

☐ Yes ☐ No

If yes, which type of biocide, and how much?_____

[1]*Added substances comprise all chemical products and ingredients of these, including additives (e.g. pigments) in ingredients, but not contaminants from raw material, incl. raw material production. Contaminants are defined as residues from raw material, incl. raw material production present in the finished product in concentrations of less than 100 ppm (0.01 weight %, 100 mg/kg), but not substances that are added to a raw material or product for a purpose, irrespective of quantity.*

Is the fibre dyed? ☐ Yes ☐ No
If yes, the dyes must fulfil chapter 2.4.2.
